- k. Click OK to close the certificate information window
- l. Go back to the webpage and click on **Install this Certificate**

Note for Bank IT Departments

The “root certificate” installation is required before one may download and install the CA certificate. The “root certificate” may require the requestor to have administrator rights on their machine in order to complete the installation. Please either provide the user with administrator rights or download the “root certificate” on the machine on the user’s behalf.

- A) **Log on** to the user’s computer **as Administrator** and log on to <https://bigcert.pcbb.com/certsrv/> in Internet Explorer
- B) Enter your (or users) email address and password for Profitability FIT

A login form with a blue gradient background. It contains two input fields: "Email Address" and "Password". Below the "Password" field is a "Log In" button. At the bottom left, there is a link that says "Forgot your password?".

- C) Install the “root certificate” by clicking on Root Certificate installation.

Root Certificate Install

Install this Root Certificate by clicking the link below and acknowledging the security warnings.
Once the certificate has been installed, click Continue.

[Root Certificate installation](#)

Continue

Cancel

- D) To check that the “root certificate” has installed correctly,:
- Go to Internet Explorer Tools and select **Internet Options**.
 - Select the **Content** tab and then **Certificates**.
 - The root certificate will be installed in the **Trusted Root Certification Authorities** tab as **BIGWEB1**. (See image on next page)
 - BIGWEB1** must be present in this tab before the user may log into the machine and proceed with steps 6 – 11.
