## **Jobless Claims: Still Over 250k**

**Bottom Line:** Claims fell last week after jumping sharply in the previous two weeks. The trend is mixed to higher at this point, with the 4-week average now above the 13-week average. However, we should caveat that heavy seasonal adjustments with many states providing only estimates of claims in the first few weeks of the New Year suggest this could still prove to be a blip in trend. That said, households continue to struggle with issues like childcare when a member of their household gets a positive Covid test, making it challenging to meet the demands of employment that must be done on-site.

Our Nowcast index is also trending higher and suggests we could see continued readings in the 250 - 300k range for at least a couple more weeks. So far, this shift in trend for claims appeared not to be a concern for the Fed as Chair Powell continued to describe the labor market as robust in his press conference yesterday.

## Claims vs. Nowcast Index Data - since Covid

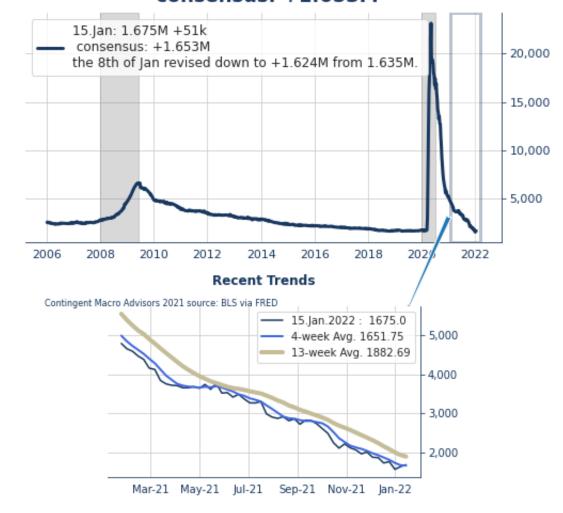

## Initial Jobless Claims 22.Jan: 260k -30k consensus: +265k

## Continuing Claims 15.Jan: 1.675M +51k consensus: +1.653M
