### **Consumer Sentiment: Continued Rebound**

**Bottom Line:** After hitting record lows in June, consumer sentiment continued to rebound, with the preliminary reading for September coming in just below expectations. Consumers' expected year-ahead inflation rate declined to 4.6%, the lowest reading since last September, and their 5-year inflation outlook fell to 2.8%, below the 2.9-3.1% range for the first time since July 2021. That said, uncertainty about inflation remained extremely high. Overall, the modest declines in gasoline prices have eased consumers' fears about inflation just slightly and buoyed their outlooks, but their sentiment remains historically low.

U. Mich. Consumer Sentiment September: +59.5, consensus: +60

Contingent Macro Advisors 2022 source: University of Michigan

**Consumer Sentiment** ROSE by 1.3 points in early September to 59.5%, compared with market expectations for an increase to 60.0%. Despite this month's slight increase, sentiment is now 18.3% BELOW its year-ago level.
